Pre-Calculus 11: Ch2 Trigonometry HW Lesson 2 Angles in Standard Position

1. Draw each angle in standard position then find the value of the reference angle:

a) 120°  Reference Angle:	b) -300°  Reference Angle:	c) 235°  Reference Angle:	d) -420°  Reference Angle:
e) 800°  Reference Angle:	f) 1000°  Reference Angle:	g) -500°  Reference Angle:	h) -3000°  Reference Angle:

2. Given each pair of angles, indicate whether if they are co-terminal. Show your work to justify your answer:

a) $35^\circ, 695^\circ$	b) $900^\circ, 330^\circ$	c) $720^\circ, 1080^\circ$
d) $-475^\circ, 605^\circ$	e) $-2590^\circ, 290^\circ$	f) $1825^\circ, 375^\circ$

3. What does it mean that an angle is in standard position? Explain:

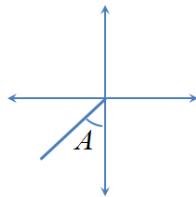

4. What is the smallest positive co-terminal angle of 2000° ? Which quadrant is it in?

5. Give a general formula for all the co-terminal angles of -5200°

6. Write a general formula for all co-terminal angles of a) 75° b) -200°

7. An angle in quadrant 3 has a reference angle of 31° . If the angle is greater than 600° , then what is the smallest possible answer?

8. Given that angle "A" is 47° , what is the value of the angle in standard position?

9. Angle "x" is between 0° and 360° , and has a reference angle of 24° . What are all the possible values of angle "x"?
